

To help make the use of prescription drugs safer and more affordable, our plan is now using a Drug Quantity Management program (Quantity Limits or QL). That is, for certain medications, you can receive an amount of medication to last you a certain number of days. This gives you the right amount to take and a daily dose that is considered safe and effective, according to the recommendations of the U.S. Food and Drug Administration (FDA). Based on the FDA’s guidelines and other medical information, our plan developed this program together with Express Scripts, the company chosen to manage our prescription drug benefit.

How to Search

For PC Users: Hold down the ‘Ctrl’ and ‘F’ keys at the same time, or click on the Binoculars icon, to open the search pane.

For Mac Users: Hold down the ‘Command’ and ‘F’ keys at the same time, or click on the Binoculars icon, to open the search panel.

Medications listed on this Quantity Limits list may not be included in your pharmacy benefit coverage. Quantity limits are based on dose and packaging. Refer to the 2018 Formulary Guide for a list of covered medications and pharmacy benefit coverage descriptions.

The quantity limits below, displayed in the center column titled Maximum Quantity, apply to both the BRAND medication (left column) and the generic equivalent (right column).

Please Note: Opioid (narcotic analgesics) limits are based on Maine regulations.
