

July 1, 2019 Drug Formulary Changes

From time to time, Community Health Options formulary is updated to add or remove medications. The table below indicates medications that will be removed from the formulary effective July 1, 2019

Members who are impacted by these changes will receive a letter by mail that includes the formulary alternatives where a formulary alternative is available.

To view formulary alternatives, you can visit our drug formulary on the Health Options website

If you are currently prescribed one of these medications, you should contact your provider to discuss formulary alternatives. Formulary alternatives may be located on our website under the drug formulary section.

The following drugs are being removed from the formulary effective July 1, 2019.
